

7<sup>th</sup> - 20<sup>th</sup> January 2019

More than  
90 workshops!

*for all  
ages!*

# Kaya, welcome to Bunbury Summer School

Participation, Education and Activation guide our journey as we move into the sixth year of Bunbury Summer School.

An inclusive program of workshops catering for ages 5 to 105, all skill levels and interests, provides a good base to explore and share knowledge. This year we have incorporated a series of multicultural and master tutors facilitating classes in Chinese Culture, Resin art, Basket making, sign language, colour theory and shadow art through paper cutting.

This multicultural immersion has been made possible through the generous support of our funding partners: City of Bunbury, Department of Local Government, Sport and Cultural Industries, Southern Ports and Healthway. Don't miss out on booking in to any of these classes delivered by international tutors and offered at highly subsidised rates! For the first time this year we are also supporting a resident artist Esther McDowell who will be working at Stirling Street Arts Centre throughout Summer School.

## FLICKERSCOPES

with NICOLE AZZALINI

Flickerscopes or thaumatropes were a popular toy for adults and children during the Victorian era. A thaumatrope is a disk with pictures on each side that is attached to two pieces of string. When the strings are twirled quickly between the fingers the two pictures appear to blend into one due to the persistence of vision. Come in to the Museum to create your own design. The designs can be as elaborate or as simple as you want!

# Discover Science & Creativity

## SEEING COLOUR: ART FOR NON- ARTISTS

with DR. PAUL GREEN-  
ARMYTAGE

Participants in this workshop will be looking closely to see subtle colour relationships and will try to capture the colour character of a flower or a painting. The second aim is to open up new ways of generating colour combinations for possible application in such fields as textiles and interior design. Participants will work with coloured paper to produce simple designs in a standard format. The standard format will make it easier to focus on colour relationships and on how the dimensions of hue, value and chroma contribute to the overall effect of a design. No skills are required and all materials will be provided. Participants will leave with their own examples of 'Instant Art'.
